Data source: IFM Investors, IRESS

The above information, compiled by IFM Investors, shows Total Shareholder Return (TSR) for the 170 largest companies listed on the Australian Securities Exchange. The size of a company is determined by its market capitalisation, calculated as price multiplied by ordinary fully paid shares on issue, at the start of the previous quarter. TSR expresses the current price of a stock, plus all dividends accrued within the period, as a percentage of the share price, adjusted for any capital events, at the start of the period.
